

## **The Silent Killer that Cumin Does NOT Fight. But Black Cumin Seed Oil DOES.**

Recently, a friend of ours suffered a devastating loss. Our hearts broke for her.

Her spouse was 52 years old, felt great, and everyone THOUGHT he was healthy.

He wasn't. He had a massive heart attack and passed away.

It seemed like he didn't have any symptoms or warning signs, and then out of nowhere... He was gone.

Perhaps you've heard similar stories. Practically everyone knows someone who has experienced a shocking loss like this.

But there is something you can do to prevent it from happening to you or someone you love.

The silent killer behind this sort of story is not just heart disease, but inflammation, which is the root cause of heart disease, the #1 killer in the US today.

### **Acid = Inflammation, the Silent Killer**

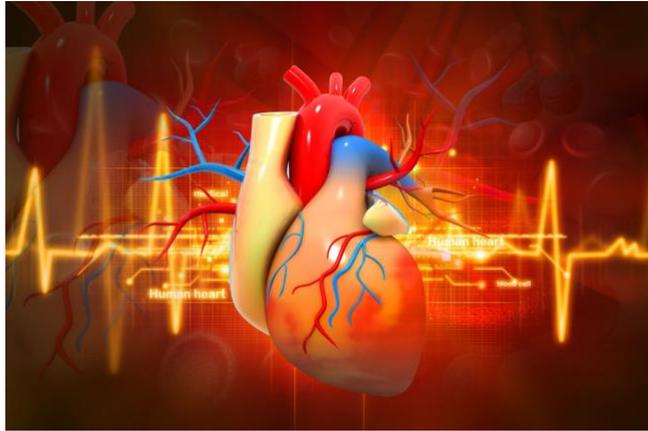

Inflammation is not necessarily something you feel until it's gotten out of control. Just like a cavity that takes a while before it turns into a toothache, inflammation is often undetected until it's severe.

Sometimes it presents itself as hormone imbalances, achy joints, painful muscles, fatigue, tummy problems, autoimmune disease, and yes, even cancer.

Just as you don't want to wait for the toothache to take care of your teeth, it's important that you don't wait for a symptom to reduce, remove, and prevent inflammation in your body, joints, organs, and brain.

**In our modern world, we are bombarded by 80,000 toxic chemicals** currently used in the US, as well as massive amounts

of stress. Combined, those forces lead to inflammation that is hijacking our brains, hearts, and bodies.

That's why it's essential that we prevent inflammation, so that we won't end up as another statistic.

So today, I want to tell you about a powerful seed that can do just that, plus another seed that is commonly confused with it.

So let's set the record straight...

Cumin, the popular spice you probably have on your spice rack, is NOT the same as black cumin seed oil, which comes from Asia and the middle east.

**Cumin**, scientifically known as *cuminum cyminum*, is a seed that is finely ground to be used in cuisines around the world from Indian to Mexican. Make no mistake, cumin is good for you. It's high in iron, antioxidants, and phytonutrients. And studies have linked it to decreased risk of Parkinson's disease and IBS, as well as improving insulin regulation for some patients.

However, it's a completely different plant than the inflammation-busting wonder seed that is black cumin seed!

**Black cumin seed** and its most powerful form, as a cold-pressed oil, comes from the *nigella sativa* plant that grows in North Africa, parts of Asia, and the Middle East. In fact, ancient Egyptian kings, queens, and pharaohs relied on this potent super seed for optimal health, beauty, and wellness.

**You know how popular turmeric is as an anti-inflammatory, but what you may not know is that research shows black cumin seed is 3 TIMES more potent than turmeric!**

In addition to being a source of healthy fats, black cumin seed oil is rich in healthy compounds like flavonoids. The most potent compound is *thymoquinone*, a powerful, all-natural anti-inflammatory that is clinically proven to:

- Reduce the size of cancerous tumors in several studies, including colorectal, breast, bone, ovarian, pancreatic, leukemia, and lymphoma – that is hugely important and cannot be overstated!
- Optimize cholesterol levels
- Boost the immune system
- Provide antibacterial and anti-fungal protection
- Reduce allergy symptoms in patients due to its anti-inflammatory properties
- Help protect against diabetes
- Strengthens connective tissue in skin, hair, and nails, slowing signs of aging 1,000 times more powerfully than vitamin E!
- Lower the risk of Alzheimer's and other forms of dementia, as it boosts memory, cognition, and attention span

**In all, there are more than 500 research studies on the therapeutic benefits of black cumin seed oil!** It's hard to argue with that.

Unlike some supplements, including our Daily Minerals and Daily Greens, black cumin seed oil may not make you feel different and better immediately (but for some clients it does). However, your body will feel the difference, and over the long term, you'll notice that you're not experiencing the symptoms and side effects of chronic inflammation.

One thing that's important to note about black cumin seed oil is that the quality varies immensely. Most of the oil and supplements on the market come from seeds grown in India, and unfortunately, it's often cut with cheaper oils, diluting its potency. Seeds grown in the Middle East are reliably of higher quality.

Even among supplements that are pure and potent, some of them are stored improperly. They should always be stored in dark bottles because sunlight is damaging.

Plus, it's a very powerful and harsh tasting oil, so many companies mix it with honey as a liquid supplement, or recommend buyers mix it with honey, which is high in FRUCTOSE, making it acidic and inflammatory, defeating the whole purpose.

## Why Daily Cumin3X is Different

I created [Daily Cumin3X](#) because black cumin seed oil is the most powerful, natural anti-inflammatory, to help you get off your acid and reduce the inflammation in your body. Plus, I wanted to bring you the absolute BEST quality black cumin seed oil supplement available on the PLANET!

My search brought me to Israel. Because of the climate there, the result is a super seed. **Ours is research proven, 3 TIMES more potent than any other black cumin seed oil, measured by thymoquinone.** Our leading competitor has 1% of this active ingredient, and Daily Cumin3X has 3%. That's where the 3 in 3X comes from!

Science tells us that to get the ideal therapeutic benefit, you need 500mg per day, so that's exactly what we put in each capsule. Some brands have more, some have less, but more is not necessarily better. You want exactly 500mg daily.

With other brands, even if they contain exactly 500mg, it's hard to know what you're really getting. You see, we made the capsule different and better than anything else out there.

It looks black, but it's actually very dark green. That's because it contains chlorophyll – the same plant energy that is found in green foods like spinach and celery – making it much easier to breakdown and digest, even if you have digestion issues, so the bioavailability sky rockets above other leading brands, which will in turn aid digestion.

It also contains the novel fatty acid called omega-7, which research shows can help break the viscous cycle of high blood sugar, elevated lipid levels, inflammation, and excess fat gain, as well as enhance insulin sensitivity.

Our cutting edge capsule is also 100% vegan, and unlike most vegetarian capsules, this technology uses:

- NO toxic ingredients
- NO processed, refined oils
- NO artificial ingredients
- NO inflammatory, acidic fats

After all, what's the point of taking an anti-inflammatory that's stored in an inflammatory capsule?

If you've experienced any precursors to heart disease like high blood pressure or high cholesterol, or any signs or symptoms of chronic inflammation, you've got to try this incredible tool for your health and wellness!

I've been offering it to patients here in my wellness clinic as we've been in the development process, and the results are amazing. People with high blood pressure – one of the biggest health threats caused by chronic inflammation – immediately saw their blood pressure go way down to safer levels.

#### **Improved my blood pressure**

"When I started taking Daily Cumin3X, my blood pressure was dangerously high, at 170/105 (not good!). After 45 days of being on the supplement, I am THRILLED to say that my blood pressure is on the high end of NORMAL, and is continuing to drop. I started taking the Daily Cumin3X side-by-side my Daily Omega-3, and the two together did the job! I avoided any medications, and couldn't be happier." —Renee G. Verified Buyer

#### **Quality, Price, Convenience!**

"Price on the Subscribe & Save is less than my old inferior brand! My BP was very high before I changed to an alkaline lifestyle. For anyone wondering: Size of the capsule is pretty standard size and was very easy to swallow. This is a win-win-win: Quality, Price, Convenience!" —Tom Y. Verified Buyer

#### **Best supplement**

"This supplement is one of the best I've ever taken. I feel amazing since I started it. My mood is improved, and I feel strong. This is a difference maker. Thank you for creating this supplement and improving lives!" —Melanie M. Verified Buyer

[Try Daily Cumin3X now. Or Subscribe & Save 15%!](#)

This is DEFINITELY a supplement you'll want to start taking EVERY day. One a day, with food, and it's as small as a probiotic! And with our new chlorophyll capsule technology, the bio-availability is the exact same as if you were drinking the oil as a liquid!

*GET OFF YOUR ACID!*
